Work experience

Senior Software Developer

October 2023 - now

Sportradar

- Development and maintenance of a full-stack application for managing automated data collection processes, enabling orchestration, monitoring, and configuration of internal data-gathering tools.
- Collaborated with Product Owner and Architect to plan the feature roadmap, design new functionalities, and ensure alignment with business and technical requirements.
- Conducted code reviews, provided mentorship to team members, and promoted best practices to enhance code quality, maintainability, and development efficiency.
- Contributed to the DevOps aspects of the project, supporting database performance, caching strategies, monitoring, and alerting to ensure system reliability and scalability.
- Influenced the testing process by focusing on validating real use cases rather than covering specific lines of code.
- Created documentation for our gRPC API generated from proto files, so consumers can easily discover and understand the available features.

Technologies: TypeScript, Jest, Vite, Vitest, Playwright, React.js, Ant Design, Socket.io, gRPC, Node.js, NestJS, TypeORM, MySQL, Redis, Kubernetes, AWS, Terraform, Terraform CDK, Jira

Senior Software Developer

September 2021 - October 2023

CDQ

- Development and maintenance of Cloud Apps - fullstack application serving as a hub for CDQ's DQaaS solutions.
- Worked closely with other teams to identify and resolve bugs.
- Implemented testing processes to ensure software quality.
- Proposed and led the migration of our backend from bare Express to NestJS.
- Contributed to the design process of new features.
- Mentored junior developers on best practices for code quality and development processes.

Technologies: TypeScript, React.js, Redux, SASS, Bootstrap, Node.js, Express, NestJS, Jest, Playwright, Vite, Jenkins, Gradle, Jira

Software Engineer

March 2020 - September 2021

Capgemini

- Contributed to the development and maintenance of a large-scale health insurance platform.
- Maintenance of existing code, fixing bugs, covering code with unit, integration and E2E tests
- Participated in code reviews and provided constructive feedback to improve code quality and maintainability
- Development of API testing tool build with Typescript and Nest.js

Technologies: C#, .NET Framework, Sitecore, MS SQL, SASS, Bootstrap, Webpack, JavaScript, jquery, Jest, Selenium, Azure DevOps, Teamcity, TypeScript, NestJS

Reporting specialist

September 2018 - March 2020

DXC

- Designed and developed web application to enable easy viewing of internal reports for various stakeholders.
- Preparing reports related to SLA, BC etc. based on various data sources.
- Automating daily tasks with VBA and AHK

Technologies: MS SQL, JavaScript, React.js, Redux, Webpack

I hereby give consent for my personal data included in my application to be processed for the purposes of the recruitment process.

Projects

CodersCamp

September 2018 - now

- Served as a mentor for a free programming course designed for beginners, providing guidance and support to students.
- Conducted one-on-one and group mentoring sessions, answering questions and helping students to solve problems and complete assignments.
- Reviewed and provided feedback on student code, helping them to improve code quality and adopt best practices.
- Developed and led presentations and workshops to supplement course content and help students build a strong foundation in programming.
- Collaborated with other mentors and course organizers to continuously improve course content and delivery, resulting in increased student engagement and success.

Demo: <https://www.coderscamp.edu.pl/>

Technologies: Git, HTML5, CSS3, SASS, JavaScript, TypeScript, React.js, Redux, Next.js, Node.js, Express, MongoDB, NestJS, ESLint, Prettier, Vite, Jest

Blazestore

October 2022 - April 2023

- Type safe Firestore wrapper library. Developed and published on npm to speed up prototyping process with firebase

Repository: <https://github.com/CaptainObjective/blazestore>

Website: <https://www.npmjs.com/package/blazestore>

Technologies: Firebase, TypeScript, React.js, Prettier, Vitest

DevsCard

October 2022 - April 2023

- Supported the development of a fully customizable template for creating online and paper resumes, providing guidance and advice to other developers working on the project.
- Contributed to the development of project plans, defined tasks, and estimated completion times to ensure successful project delivery.

Repository: <https://github.com/KonradSzwarc/devscard>

Technologies: Astro, TypeScript, Prettier, ESLint

Hackathon projects:

September 2018 - now

31.03-01.04 2023 - 6. Bydgoski Hackathon - Winner

04.06-05.06.2022 - Livechat Hackathon - 3rd Place

23.04-25.04.2021 - 2MD Hackaton - Winner

17.03-22.03.2020 - Hack the Crisis: Tech for Good Hackathon - Top 10

11-12.10.2019 - Divante Hackaton - Winner

24.05-25.05.2019 - Livechat Hackathon - 3rd Place

14.09-15.09.2018 - RST Hackathon - Winner

:

I hereby give consent for my personal data included in my application to be processed for the purposes of the recruitment process.

Education

Finance and Accounting, Bachelor's degree

October 2014 - June 2017

Wrocław University of Economics

- Member of student organization "Bankier", responsible for maintaining website and a Facebook profile of the organization.
- Conducting VBA training for other students during GrafIT event on Wrocław university of Economics
